OBJECTIVE

Software Developer with hands-on experience at ObjectSol Technologies Pvt. Ltd., specializing in building scalable and maintainable web applications using React, TypeScript, and Next.js. Proficient in integrating AI-powered solutions and delivering intuitive user experiences through responsive and accessible interfaces. Strong team player with a solid foundation in Agile methodologies, clean code practices, and modern frontend architecture.

EXPERIENCE

Software Developer

ObjectSol Technologies Pvt. Ltd.

July 2025 – Present

Kolkata, India

- Developed scalable, interactive web applications using React, Next.js, TypeScript, and Tailwind CSS.
- Integrated AI-powered image generation APIs for real-time visual outputs based on user inputs.
- Implemented features including file uploads, local media previews, and dynamic content rendering.
- Managed complex asynchronous workflows with effective loading states and robust error handling.
- Collaborated with backend teams to define API contracts and validate data flows.

SKILLS

Programming Languages	TypeScript, JavaScript, Python, C
Frontend Development	React.js, HTML5, CSS3
Frameworks	Next.js, Tailwind CSS, Material UI, Bootstrap
State Management	Redux, RESTful APIs
Development Tools	Git, GitHub, Postman, VS Code
Operating Systems	Windows, Linux, macOS

EDUCATION

B.Tech. — Electrical Engineering, College of Engineering and Management, Kolaghat 2021 - 2024

Diploma — Electrical Engineering, Netaji Subhash Engineering College 2015 - 2018

PROJECTS

Brain Challenge – Quiz App [\[Live\]](#)

Developed a responsive, single-page quiz web application using React, TypeScript, Tailwind CSS, and OpenTDB API. Implemented category-based question filtering, difficulty levels, real-time score tracking, and a countdown timer. Utilized Axios for API integration, React Router for navigation, and applied responsive UI design principles to ensure mobile and cross-browser compatibility.

Portfolio Website [\[Live\]](#)

Designed and deployed a personal developer portfolio using React, TypeScript, Tailwind CSS, and Firebase. Incorporated animations with Framer Motion and interactive 3D graphics using Three.js and @react-three/fiber. Optimized for performance, accessibility, and responsiveness across devices. Highlights projects, technical skills, and professional experience.

CERTIFICATIONS

- Completed a 6-month professional ReactJS training program from Ejob India, gaining hands-on experience in building dynamic, component-based web applications.
- Completed Python course from BG Infotech with practical skills in Python programming, covering data types, functions, control flow, and file handling.
